Oleksandr Altukhov

E-HEALTH · HEALTH DATA · AI & AGENT SYSTEMS

PROFILE

Medically trained (degree assessed equivalent to a Norwegian medical degree), working in municipal healthcare while building AI agents and digital workflows (memory, context, API and model calls) with Claude Code and Codex — practically a second job alongside a permanent position. Daily documentation in Helseplattformen and medication responsibility across three wards give concrete understanding of the needs e-health solutions are built to meet. The bridge between clinic and technology: from need to working solution.

KEY COMPETENCE

- **AI agents and automation:** Builds LLM workflows with memory, context, tools/skills and API/model calls (Agent SDK, MCP, OpenRouter); Claude Code and Codex in daily work; Python and SQL underneath.
- **E-health and systems understanding:** Daily documentation in Helseplattformen from the user side in a nursing home; medication responsibility (administration, documentation, quality control); picks up new digital systems and national solutions fast.
- **Welfare technology (care side):** Daily user of safety alarms and sensors; reports and follows up faults, liaises with technical support; knows alarm handling, user needs and the collaboration around the technology.
- **Clinical understanding:** Medical master's degree + nursing-home experience (clinical assessment, medication responsibility, documentation, ProACT); knows municipal health and care services from the inside.
- **Collaboration:** Interdisciplinary communication with patients, relatives and clinicians; mentor in a workplace-integration assignment with NAV and Kristiansund municipality.

EXPERIENCE

Care worker — Helseplattformen, welfare technology and clinical work May 2024 – present
Kringsjå nursing home, Kristiansund · permanent position since Sept 2025

- Daily documentation in **Helseplattformen**; clinical assessment, care plans, follow-up and ProACT.
- **Welfare technology in daily operations** — sensors and safety alarms: reports and follows up faults, liaises with technical support until equipment is back in service.
- Medication responsibility across three wards since Aug 2024 — administration, documentation and quality control.

AI agents, data and automation — personal projects 2023 – present
Independent, alongside permanent position · alksalt.com · github.com/Alksalt

- Builds **AI agents and digital workflows**: memory/context, tools and skills, API and model calls (Agent SDK, MCP, OpenRouter, local models); uses Claude Code and Codex to research and build fast. Works on this steadily — practically a second job.
- Data analysis in **Python** (pandas, numpy, matplotlib, seaborn): data cleaning, analysis and visualisation; small tools with database, logging, testing and API integration.

Mentor — workplace integration Jan 2026 – present
Kristiansund · in cooperation with NAV and Kristiansund municipality

Mentors a newcomer into employment: maps needs, solves ongoing challenges, provides close follow-up; sends regular evaluations to my manager. Cross-service collaboration.

Marketing specialist — projects, analytics and KPIs 2018 – 2022
Kharkiv, Ukraine

Client projects with goals, KPIs and budgets; analytics, reporting and data-driven communication in parallel with medical school.

Surgical department observership · earlier healthcare experience 2016 – 2024
Kristiansund Hospital (2023–24) · Ukraine (2016–17)

Observation of clinical work and patient care; nurse assistant and placements in surgical/acute wards.

EDUCATION AND AUTHORISATION

Master's degree in Medicine (M.D.) 2013 – 2021
Kharkiv National Medical University, Ukraine · approved by the Norwegian Directorate of Health and NOKUT

Assessed as equivalent to a Norwegian medical degree. Foundation in clinical assessment, scientific method and statistics.

Limited Norwegian licence as physician — Norwegian Directorate of Health

Documents medical competence. This CV targets e-health, health data and AI roles, not physician/residency positions.
